

# DANGER! Noise puts employees & profits at risk. Listen to VIBCO's silent solution.

We're the Vibrator Guys.™

## Product Application Bulletin #424 Model CCL-7000 Silent Pneumatic Turbine Vibrator

### VIBCO'S SOLUTION

VIBCO CCL-7000 Silent Pneumatic Turbine Vibrators were mounted to the concrete forms. They produce the right amount of force and amplitude to properly consolidate the concrete. Overall noise levels were reduced to 78 dB, well below OSHA standards. The risk of possible hearing injuries was removed without sacrificing product quality or production rate.

### VIBCO'S BENEFITS

After installing the VIBCO CCL-7000 Silent Pneumatic Turbine Vibrators, the customer received the following benefits:

- Facility met OSHA noise standards
- Eliminated risk of employee hearing injury
- Maintained production rate and product quality

CCL-7000

### CONCRETE FORMS

## “Our facility was loud... Real loud!

The roller-style vibrators that we were using worked great, but man, they made a racket - well over 110 dB. Our employees weren't happy with the noise, nobody could hear or talk when those things were running, and I know the dB levels were way above OSHA standards, which means we were risking employee hearing damage. We had to do something about the noise, but we really needed those vibrators to keep our production running smoothly and our product looking good. When I saw VIBCO's Silent Pneumatic Turbine Vibrators at a recent plant survey, I knew that I'd found our solution...”
